Earth Auger
Operator's Manual

MODELS
EA-400
EA-500

WARNING
The muffler or catalytic muffler and surrounding cover may become extremely hot. Always keep clear of exhaust and muffler area, otherwise serious personal injury may occur.

WARNING
The engine exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

WARNING
Read rules for safe operation and instructions carefully. ECHO provides this Operator's Manual, which must be read and understood for proper and safe operation. Failure to do so could result in serious injury.
INTRODUCTION

Welcome to the ECHO family. This ECHO product was designed and manufactured to provide long life and on-the-job dependability. Read and understand this manual. You will find this manual easy to use, and full of helpful operating tips and SAFETY messages.

THE OPERATOR’S MANUAL

Read and understand this manual before operation. Keep it in a safe place for future reference. It contains specifications and information for operation, starting, stopping, maintenance, storage, and assembly specific to this product.

SAFETY
MANUAL SAFETY SYMBOLS AND IMPORTANT INFORMATION

Throughout this manual and on the product itself, you will find safety alerts and helpful informational messages preceded by symbols or key words. The following is an explanation of those symbols and key words.

This symbol accompanied by the words WARNING and DANGER calls attention to an act or condition that can lead to serious personal injury to operator and bystanders.

The circle with the slash symbol means whatever is shown within the circle is prohibited.

PERSONAL CONDITION AND SAFETY EQUIPMENT

WARNING DANGER

Earth Auger users risk injury to themselves and others if the auger is used improperly, or safety precautions are not followed. Proper clothing and safety gear must be worn when operating an auger.
**Physical Condition --**
Your judgment and physical dexterity may not be good:
- if you are tired or sick,
- if you are taking medication,
- if you have taken alcohol or drugs.
Operate unit only if you are physically and mentally well.

**Eye Protection --**
Wear eye protection that meets ANSI Z87.1 or CE requirements whenever you operate the unit.

**Hand Protection --**
Wear no-slip, heavy duty work gloves to improve your grip on the Earth Auger handles. Gloves also reduce the transmission of machine vibration to your hands.

**Hearing Protection --**
ECHO recommends wearing hearing protection whenever unit is used.

**Proper Clothing --**
Wear snug fitting, durable clothing;
- Pants should have long legs, shirts with long sleeves.
- DO NOT WEAR SHORTS.
- DO NOT WEAR TIES, SCARVES, JEWELRY.

Wear sturdy work shoes with non-skid soles;
- DO NOT WEAR OPEN TOED SHOES.
- DO NOT OPERATE UNIT BAREFOOTED.

**Hot Humid Weather --**
Heavy protective clothing can increase operator fatigue which may lead to heat stroke. Schedule heavy work for early morning or late afternoon hours when temperatures are cooler.

**Vibration and Cold**
It is believed that a condition called Raynaud’s Phenomenon, which affects the fingers of certain individuals, may be brought about by exposure to vibration and cold. Exposure to vibration and cold may cause tingling and burning sensations, followed by loss of color and numbness in the fingers. The following precautions are strongly recommended, because the minimum exposure which might trigger the ailment is unknown.

- Keep your body warm, especially the head, neck, feet, ankles, hands, and wrists.
- Maintain good blood circulation by performing vigorous arm exercises during frequent work breaks, and also by not smoking.
- Limit the hours of operation. Try to fill each day with jobs where operating the trimmer or other hand-held power equipment is not required.
- If you experience discomfort, redness and swelling of the fingers followed by whitening and loss of feeling, consult your physician before further exposing yourself to cold and vibration.
**Repetitive Stress Injuries**

It is believed that overusing the muscles and tendons of the fingers, hands, arms, and shoulders may cause soreness, swelling, numbness, weakness, and extreme pain in those areas. Certain repetitive hand activities may put you at a high risk for developing a Repetitive Stress Injury (RSI). An extreme RSI condition is Carpal Tunnel Syndrome (CTS), which could occur when your wrist swells and squeezes a vital nerve that runs through the area. Some believe that prolonged exposure to vibration may contribute to CTS. CTS can cause severe pain for months or even years.

To reduce the risk of RSI/CTS, do the following:

- Avoid using your wrist in a bent, extended, or twisted position. Instead try to maintain a straight wrist position. Also, when grasping, use your whole hand, not just the thumb and index finger.
- Take periodic breaks to minimize repetition and rest your hands.
- Reduce the speed and force with which you do the repetitive movement.
- Do exercises to strengthen the hand and arm muscles.
- Immediately stop using all power equipment and consult a doctor if you feel tingling, numbness, or pain in the fingers, hands, wrists, or arms. The sooner RSI/CTS is diagnosed, the more likely permanent nerve and muscle damage can be prevented.

**WARNING DANGER**

Do not operate this product indoors or in inadequately ventilated areas. Engine exhaust contains poisonous emissions and can cause serious injury or death.

- Provide all operators of this equipment with the operator’s manual, and instructions for safe operation.
- Review area to be augered. Beware of underground hazards such as electrical lines, gas lines, water mains, or cable and telephone lines.
- Never use ice auger without checking with local authorities for safe ice thickness in lakes, ponds, and rivers.
- Spectators and coworkers must be warned, and children and animals prevented from coming nearer than 3 m (10 ft.) while auger is in use.
- Before starting the unit, equip yourself, and any person helping you, with the required Protective Equipment and Clothing. Do not wear loose or baggy clothing while operating the auger.
- Do not allow children to operate auger at any time.
- Always keep hands, arms, legs, and feet clear of the rotating auger.
- Do not carry the auger between holes with the engine running.
- Always shut engine off before making any repairs.
- Always hold auger handles firmly with both hands during operation.
- Maintain stable footing and balance at all times. Do not stand on slippery, uneven, or unstable surfaces.
- Do not operate auger in any position other than upright.
- During operation, the muffler cover area will become very hot. Avoid contact during and immediately after operation. Allow engine and muffler to completely cool before performing any maintenance.
EQUIPMENT

WARNING DANGER

Use only ECHO approved attachments. Serious injury may result from the use of a non approved attachment combination. Read and comply with all safety instructions listed in this operator manual. ECHO, INC. will not be responsible for the failure of attachments or accessories which have not been tested and approved by ECHO.

- Check unit for loose/missing nuts, bolts, and screws. Tighten and/or replace as needed.
- Inspect fuel lines, tank, and area around carburetor for fuel leaks. DO NOT operate unit if leaks are found.
- Check that the auger is firmly attached and in safe operating condition.
- Ice blades are very sharp. Wear gloves when handling or replacing.
- Do not use any attachment, accessory, or replacement part unless it is recommended in the Operator's Manual.
- Have repairs done only by an authorized ECHO Service Dealer.

EMISSION CONTROL

The emission control system for this engine is EM (Engine Modification).

IMPORTANT ENGINE INFORMATION
ENGINE FAMILY: 5EXHS.0434RA
DISPLACEMENT: 42.7cc
THIS ENGINE MEETS U.S. EPA PH1 EMISSION REGULATIONS FOR SMALL NON-ROAD ENGINES. REFER TO OWNER'S MANUAL FOR MAINTENANCE SPECIFICATIONS AND ADJUSTMENTS.

Emission Control Label (located on Engine) (EXAMPLE ONLY, information on label varies by FAMILY). Check the label on your unit for information specific to your model.

PRODUCT EMISSION DURABILITY
The 300 hour emission durability compliance period is the time span selected by the manufacturer certifying the engine emissions output meets applicable emissions regulations, provided that approved maintenance procedures are followed as listed in the Maintenance Section of this manual.
DESCRIPTION
Locate these safety decals on your unit. Make sure the decals are legible and that you understand the symbols, and follow the instructions these symbols represent. If a decal cannot be read, a new one can be ordered from your ECHO dealer. See "Servicing Information - Parts" for more information.

Hot Decal (near muffler)
P/N 89016006361

Handle Decal
P/N X505000920
2. **STOP SWITCH** - "SLIDE SWITCH" mounted on top of the Throttle Trigger Housing. Move switch FORWARD to RUN, BACK to STOP.
3. **LOOP HANDLE** - Operator position includes Throttle Handle Assembly and loop handle. Helper position uses loop handle.
4. **PTO Shaft** - Power Take-Off Shaft provides power to Auger accessory.
5. **AUGER ASSEMBLY** - Connects to PTO Shaft. Auger Assembly is purchased separately as an accessory. See page 10 for list of auger accessories.
6. **SPARK ARRESTER - CATALYTIC MUFFLER / MUFFLER** - The muffler or catalytic muffler controls exhaust noise and emission. The spark arrestor screen prevents hot, glowing particles of carbon from leaving the muffler. Keep exhaust area clear of flammable debris.
7. **FUEL TANK** - Contains fuel and fuel filter.
8. **RECOIL STARTER HANDLE** - Pull handle slowly until starter engages, then quickly and firmly. When engine starts, return handle slowly. DO NOT let handle snap back or damage to unit will occur.
10. **PRIMER BULB** - Pumping primer bulb before starting engine draws fresh fuel from the fuel tank priming the carburetor for starting. Pump primer bulb until fuel is visible and flows freely in the clear fuel tank return line. Pump bulb an additional 4 or 5 times.
11. **AIR CLEANER** - Contains replaceable filter element.
12. **CHOKE** - Located above air cleaner housing. Move lever to starting position (close choke) and back to run position (open choke).
13. **AIR DEFLECTOR** - Deflects hot engine cooling air away from operator.
14. **GEAR CASE** - Sealed Gear Case provides 30.2 to 1 reduction for best combination of power and auger speed. Requires no user maintenance.
15. **THROTTLE HANDLE ASSEMBLY** - Contains main operator controls-Throttle Trigger, Stop Switch, and Throttle Trigger Lockout.
16. **THROTTLE TRIGGER LOCKOUT** - Operation of the throttle trigger is prevented unless throttle trigger lockout lever is engaged.
17. **THROTTLE TRIGGER** - Spring loaded to return to idle when released. During acceleration press throttle trigger gradually for best operating technique.
18. **DECOMPRESSION BUTTON** - Push button to assist starting. Automatically resets after engine starts and runs.
19. **LOWER HAND GRIP** - Used for right-hand grip by Operator during two-man operation.
20. **SPARK PLUG** - Provides spark to ignite fuel mixture.
CONTENTS

The EA-400/500 Earth Auger Powerhead, Gear Case, and Loop Handles have been factory pre-assembled for your convenience. The EA-400 Throttle Handle requires assembly. These units are designed for one-person use as an ice auger, and one or two-person use as an earth auger.

After opening the carton, check for damage. Immediately notify your retailer or ECHO Dealer of damaged or missing parts. Use the contents list to check for missing parts.

1 - Power Head/Handle/Gear Case Assembly
1 - Operator’s Manual
1 - Warranty Registration Card
1 - Limited Warranty Statement
1 - Echo Power Blend™ 2-stroke oil sample

ASSEMBLY

THROTTLE HANDLE ASSEMBLY

Tools Required: Screwdriver, cutting tool

Parts Required: Throttle Handle Assembly, screw, hex nut

1. Cut and remove one (1) white plastic shipping tie that secures handle assembly to packing materials.

   NOTE
   DO NOT cut or remove black plastic ties.

2. Remove mounting screw and hex nut from throttle handle assembly, and slide throttle handle onto mounting bar.

3. Align hole in throttle handle assembly with hole in bar.

4. Secure throttle handle to bar with screw and hex nut.

5. Tighten securely.
AUGER INSTALLATION

Tools Required: 6, 8, & 10 in. Earth Augers - (2) 9/16 in. Wrenches
2, 3, & 4 in. Earth Augers - Hex wrench
8 & 10 in. Ice Augers - Hex wrench

Parts Required: Auger Blade Assembly - Includes:
6 - 10 in. Earth Auger: 3/8-16 x 1-1/2" Bolt, 3/8-16 Hex Nut
2 - 4 in. Earth Augers: 3/8-16 x 1-1/4" Socket Head Screw
8 - 10 in. Ice Augers: 3/8-16 x 1-1/4" Socket Head Screw

1. Carefully place engine on a flat surface with muffler side down.
2. Remove assembly hardware from auger.
3. Slide auger assembly onto gear case PTO shaft.
4. Align PTO shaft mounting hole with auger mounting hole.
5. Secure auger to PTO shaft with hardware provided, and tighten securely.

NOTE
6, 8, & 10 in. Earth Augers hardware style shown in illustration.
2, 3, & 4 in. Earth augers and 8 & 10 in. Ice Augers use socket head screws only.

AUGER EXTENSION

Tools Required: (2) 9/16 in. Wrenches/ Hex Wrench

Parts Required: Auger Extension, 12 or 18 in. Includes assembly hardware.

WARNING ❖ DANGER
The muffler and area around the muffler may be extremely hot.
Avoid contact with this area, otherwise serious injury may result.

WARNING ❖ DANGER
Never operate auger with handles above chest height, otherwise you could lose control, resulting in serious personal injury.

1. Drill hole into ground 15 to 20 in. deep. Stop engine, and clean off auger mounting bolt hardware.
2. Remove auger mounting hardware. Lift engine off auger, and set aside. The engine should be supported on the ground by the handles and PTO shaft.
3. Remove extension hardware.
4. Slide extension onto auger shaft, align holes, and install mounting hardware. Tighten securely.
5. Install engine on extension shaft, and secure with hardware removed in step 2. Tighten securely.
**OPERATION**

**FUEL**

**Fuel Requirements**

*Gasoline* - Use 89 Octane [R+M/2] (mid grade or higher) gasoline known to be good quality. Gasoline may contain up to 15% MTBE (methyl tertiary-butyl ether). Gasohol containing methyl (wood) alcohol is **NOT** approved.

*Two Stroke Oil* - A two-stroke engine oil meeting ISO-L-EGD (ISO/CD 13738) and J.A.S.O. FC Standards must be used. Echo brand premium Power Blend™ Universal 2-Stroke Oil meets these standards. Engine problems due to inadequate lubrication caused by failure to use an ISO-L-EGD and J.A.S.O. FC certified oil, such as Echo premium Power Blend™, will void the two-stroke engine warranty. (Emission related parts only are covered for two years, regardless of two-stroke oil used, per the statement listed in the Emission Defect Warranty Explanation.)

**Fuel to Oil Mix - 50:1 Ratio**

<table>
<thead>
<tr>
<th>U.S.</th>
<th>METRIC</th>
</tr>
</thead>
<tbody>
<tr>
<td>GAS</td>
<td>OIL</td>
</tr>
<tr>

<tr>
<td>1</td>
<td>2.6</td>
</tr>
<tr>
<td>2</td>
<td>5.2</td>
</tr>
<tr>
<td>5</td>
<td>13</td>
</tr>
</tbody>
</table>

**IMPORTANT**

Echo premium Power Blend™ Universal 2-Stroke Oil may be mixed at 50:1 ratio for application in all Echo engines sold in the past regardless of ratio specified in those manuals.

**Handling Fuel**

**WARNING**

*Fuel is VERY flammable. Use extreme care when mixing, storing or handling or serious personal injury may result.*

- Use an approved fuel container.
- **DO NOT** smoke near fuel.
- **DO NOT** allow flames or sparks near fuel.
- Fuel tanks/cans may be under pressure. Always loosen fuel caps slowly allowing pressure to equalize.
- **NEVER** refuel a unit when the engine is **HOT or RUNNING**!
- **DO NOT** fill fuel tanks indoors. ALWAYS fill fuel tanks outdoors over bare ground.
- **DO NOT** overfill fuel tank. Wipe up spills immediately.
- Securely tighten fuel tank cap and close fuel container after refueling.
- Inspect for fuel leakage. If fuel leakage is found, do not start or operate unit until leakage is repaired.
- Move at least 3m (10 ft.) from refueling location before **starting** the engine.

**Mixing Instructions**

1. Fill an approved fuel container with half of the required amount of gasoline.
2. Add the proper amount of 2-stroke oil to gasoline.
3. Close container and shake to mix oil with gasoline.
4. Add remaining gasoline, close fuel container, and remix.

**IMPORTANT**

Spilled fuel is a leading cause of hydrocarbon emissions. Some states may require the use of automatic fuel shut-off containers to reduce fuel spillage.

**After use**

- **DO NOT** store a unit with fuel in its tank. Leaks can occur. Return unused fuel to an approved fuel storage container.

**Storage** - Fuel storage laws vary by locality. Contact your local government for the laws affecting your area. As a precaution, store fuel in an approved, airtight container. Store in a well-ventilated, unoccupied building, away from sparks and flames.

**IMPORTANT**

Stored fuel ages. Do not mix more fuel than you expect to use in thirty (30) days, ninety (90) days when a fuel stabilizer is added.

**IMPORTANT**

Stored two-stroke fuel may separate. ALWAYS shake fuel container thoroughly before each use.
STARTING COLD ENGINE

1. Place auger on flat surface, recoil starter handle (A) up.

2. *Stop Switch.*
   Move stop switch button (B) forward, away from the STOP position.

3. *Choke Lever*
   Move choke lever (C) to Cold Start Position (↓).

4. *Decompression Button*
   Press decompression button (D) once.

5. *Primer*
   Pump primer bulb (E) until fuel is visible and flows freely in the clear fuel tank return line. Pump bulb an additional 4 or 5 times.

6. *Recoil Starter*
   Hold loop handle securely with one hand, and pull the recoil starter handle (A) until engine fires (5 or 6 pulls). Do not hold engine by the throttle grip handle. DO NOT depress throttle trigger when starting.

7. *Choke Lever*
   Move the choke lever to the OPEN - RUN position (↑). Restart engine if necessary and allow to warm up at idle for several minutes.

**NOTE**
After engine starts, engine decompression button will automatically reset for normal operation.

**WARNING DANGER**
The auger attachment should not rotate at idle. If attachment rotates, readjust carburetor according to "Carburetor Adjustment" instructions in this manual or see your ECHO Dealer, otherwise serious personal injury may result.
STARTING WARM ENGINE

The starting procedure is the same as Cold Start, except DO NOT close the choke.

WARNING DANGER

When engine starts, the auger attachment may rotate, even with the throttle trigger in idle (released) position.

1. Stop Switch
   Move stop switch button (B) forward, away from the "STOP" position.

2. Primer
   Pump primer bulb (E) until fuel is visible in the "Clear" fuel return line. Pump bulb an additional 4 or 5 times.

3. Decompression Button
   Press decompression button (D) once.

4. Recoil Starter
   Lay the unit on a flat, clear area, and pull the recoil starter handle (A) until the engine fires.

NOTE
If engine does not start after 5 pulls, use Cold Start Procedure.

STOPPING ENGINE

1. Release Throttle.
   Allow engine to return to idle before shutting off engine.

2. Stop Switch
   Move stop switch button (B) backward to "STOP" position.

WARNING DANGER

If engine does not stop when stop switch is moved to STOP position, close choke - COLD START position - to stall engine. Have your ECHO dealer repair stop switch before using unit again.
DRILLING

1. After starting engine, position auger upright at desired drilling point.
2. Position feet for a stable stance, away from auger blades.
3. Firmly grip Throttle Handle Assembly and loop bar handle with right and left hands.
4. Slowly squeeze throttle trigger to engage clutch and rotate auger. Apply light downward pressure on handles to drill hole. Periodically, raise the auger to help clear drilling debris from the hole.
5. Overloading the auger during drilling may cause it to stop turning. When this occurs, lift the auger to reduce the drilling load on the engine, and allow drilling debris to be augered out of the hole. Resume drilling.

IMPORTANT
While drilling, the auger may twist suddenly and forcefully if it contacts large rocks, roots, or other hidden obstacles. Release throttle trigger immediately, and lift auger out of hole. Clear the obstacles to prevent damage, and then resume drilling.

6. Drilling holes six inches in diameter or larger may be easier if two people hold the handles on opposite sides.
7. Two-man Operation - The operator (A), guides the auger while gripping the Throttle Handle Assembly and lower hand grip. The helper (B), assists by guiding auger while gripping loop handle on opposite side of auger.
8. Do not place excessive body weight on the unit. Allow auger to drill with a shaving action using light downward pressure.
9. Do not use an ice auger in earth, or an earth auger in ice. A different style of auger is required for each type of drilling.
10. Do not operate unit in excessively rocky ground.

WARNING  ⚠️  DANGER
Never operate auger with handles above chest height, otherwise you could lose control, resulting in serious personal injury.

WARNING  ⚠️  DANGER
During operation, the muffler or catalytic muffler and surrounding cover become hot. Always keep exhaust area clear of flammable debris during use, otherwise serious property damage or personal injury may result.
MAINTENANCE

Your ECHO Auger is designed to provide many hours of trouble-free service. Regularly scheduled maintenance will help your unit achieve that goal. To help you decide whether you want to do it yourself, or have the ECHO Dealer do it, the skill level required for each maintenance task has been graded. If you are unsure, or are not equipped with the necessary tools, you may want to take your unit to an ECHO Service Dealer for maintenance. The various part numbers required for each task are listed below the task headings on the following pages. If a task is not listed, see your ECHO Dealer for repairs. See your Echo dealer for all parts.

SKILL LEVELS

<table>

MAINTENANCE PROCEDURE LETTER CODES:  I = INSPECT, R = REPLACE, C = CLEAN

IMPORTANT NOTE - Time intervals shown are maximum. Actual use and your experience will determine the frequency of required maintenance.

MAINTENANCE PROCEDURE NOTES:

* All recommendations to replace are based on the finding of damage or wear during inspection.
AIR FILTER

Level 1.

Tools required: 25 or 50 mm (1 or 2 in.) Cleaning brush

Parts required: Air Filters

1. Close choke (Cold Start Position [↓↓]). This prevents dirt from entering the carburetor throat when the air filters are removed. Brush accumulated dirt from the air cleaner area.

2. Unsnap the air filter cover latch (A), and open the air filter cover (B).

3. Clean the foam filter in water/detergent solution. Wrap the foam filter in a clean cloth and squeeze (do not wring) dry. Do not oil foam filter. Lightly brush debris from felt filter.

   NOTICE
   If elements are fuel soaked, very dirty, deformed, or torn, replace, otherwise engine damage may occur.

4. If elements can be cleaned and reused, be certain they:
   • still fit the cavity in the air cleaner cover.
   • are installed with the original side out.

FUEL FILTER

Level 1.

Tools required: 200-250 mm (8-10 in.) length of wire with one end bent into a hook, clean rag, funnel, and an approved fuel container.

Parts required: Fuel Filter

WARNING ⚠️ DANGER
Fuel is VERY flammable. Use extreme care when mixing, storing or handling.

1. Use a clean rag to remove loose dirt from around fuel cap and empty fuel tank.

2. Use the “fuel line hook” to pull the fuel line and filter from the tank.

3. Remove the filter from the line and install the new filter.
SPARK PLUG

Level 2.

Tools Required: Spark plug wrench, feeler gauge, soft metal brush.

Parts Required: RCJ-6Y Spark Plug, P/N15901731730

1. Remove spark plug and check for fouling, worn and rounded center electrode.

2. Clean the plug or replace with a new one. DO NOT sand blast to clean. Remaining sand will damage engine.

3. Adjust spark plug gap by bending outer electrode.

4. Install Spark Plug, and tighten to 150-170 kg/cm (130-150 in. lb.).

COOLING SYSTEM

Level 2.

Tools required: Air compressor and safety nozzle, or: 4 mm Hex wrench, 25 - 50 mm (1 - 2 in.) cleaning brush.

Parts Required: None.

IMPORTANT

To maintain proper engine operating temperatures, cooling air must pass freely through the cylinder fin area. This flow of air carries combustion heat away from the engine.

Overheating and engine seizure can occur when:
• Air intakes are blocked, preventing cooling air from reaching the cylinder.
• Dust and debris build-up on the outside of the cylinder. This build-up insulates the engine and prevents the heat from leaving.

Removal of cooling passage blockages and cleaning of cooling fins is considered “Normal Maintenance.” Any failure attributed to lack of maintenance is not warranted.

1. Periodically blow dirt and debris off cooling fins with a compressor and safety nozzle, or;

2. Remove engine and muffler covers, and brush off dirt and debris using the medium bristle brush.
EXHAUST SYSTEM

Spark Arrestor Screen

Level 2.

Tools Required: Cross Head Screwdriver, Soft Metal Brush, 4 mm Hex Wrench

Parts Required: Spark Arrestor Screen, Gasket

1. Remove muffler cover (A).
2. Place piston at Top Dead Center (TDC) to prevent carbon/dirt from entering cylinder.
3. Remove spark arrestor screen cover (B), screen holder (C), gasket (D), and screen (E), from muffler body.
4. Clean carbon deposits from muffler components.
5. Replace screen if it is cracked, plugged, or has holes burned through.
6. Assemble components in reverse order.

Cylinder Exhaust Port

Level 3.

IMPORTANT
The cylinder exhaust port must be inspected and cleaned of excess carbon every 3 months or 90 hours of operation to maintain this engine within the emissions durability period. ECHO strongly recommends that you return your unit to your ECHO dealer for this important maintenance service.
CARBURETOR ADJUSTMENT

Engine Break-In
New engines must be operated a minimum duration of two tanks of fuel break-in before carburetor adjustments can be made. During the break-in period your engine performance will increase and exhaust emissions will stabilize. Idle speed can be adjusted as required.

High Altitude Adjustment
High altitude adjustment is not required for proper operation of this engine.

Level 2.

Tools required: Screwdriver, Tachometer (ECHO P/N 99051130017).

Parts required: None.

NOTE
Every unit is run at the factory and the carburetor is set in compliance with emission regulations. This carburetor does not have acceleration and high speed adjustment needles.

1. Check idle speed and reset if necessary. Idle speed screw (A) should be set to the specifications found on page 22, "Specifications" of this manual. Turn idle screw (A) clockwise to increase idle speed; counter-clockwise to decrease idle speed.

WARNING DANGER
When carburetor adjustment is completed, the cutting attachment should not turn at idle, otherwise serious personal injury may result.
## TROUBLESHOOTING

### WARNING

Fuel vapors are **extremely** flammable and may cause fire and/or explosion. **Never** test for ignition spark by grounding spark plug near cylinder plug hole, otherwise serious personal injury may result.
STORAGE

Long Term Storage (over 30 days)

**WARNING DANGER**
During operation the muffler or catalytic muffler and surrounding cover become hot. Always keep exhaust area clear of flammable debris during transportation or when storing, otherwise serious property damage or personal injury may result.

Do not store your unit for a prolonged period of time (30 days or longer) without performing protective storage maintenance which includes the following:

1. Store unit in a dry, dust free place, out of the reach of children.

**WARNING DANGER**
Do not store in enclosure where fuel fumes may accumulate or reach an open flame or spark.

2. Place the stop switch in the “STOP” position.

3. Remove accumulation of grease, oil, dirt, and debris from exterior of unit and accessory augers.

4. Perform all periodic lubrication and services that are required.

5. Tighten all the screws and nuts.

6. **Drain** the fuel tank completely, and pull the recoil starter handle several times to remove fuel from the carburetor.

7. Remove the spark plug and pour 7 cc (1/4 oz.) of fresh, clean, two-stroke engine oil into the cylinder through the spark plug hole.
   
   A. Place a clean cloth over the spark plug hole.
   B. Pull the recoil starter handle 2-3 times to distribute the oil inside the engine.
   C. Observe the piston location through the spark plug hole. Pull the recoil starter handle slowly until the piston reaches the top of its travel and leave it there.

8. Install the spark plug (do not connect ignition cable).

SERVICING INFORMATION

PARTS
Genuine ECHO Parts and ECHO REPOWER™ Parts and Assemblies for your ECHO products are available only from an Authorized ECHO Dealer. When you do need to buy parts always have the Model Number and Serial Number of the unit with you. You can find these numbers on the engine housing. For future reference, write them in the space provided below.

Model No. ___________ SN. ___________

SERVICE
Service of this product during the warranty period must be performed by an Authorized ECHO Service Dealer. For the name and address of the Authorized ECHO Service Dealer nearest you, ask your retailer or call: 1-800-432-ECHO (3246). Dealer information is also available on our Web Site. When presenting your unit for Warranty service/repairs, proof of purchase is required.

ECHO CONSUMER PRODUCT SUPPORT
If you require assistance or have questions concerning the application, operation or maintenance of this product you may call the ECHO Consumer Product Support Department at 1-800-673-1558 from 8:30 am to 4:30 pm (Central Standard Time) Monday through Friday. Before calling, please know the model and serial number of your unit to help your Consumer Product Support Representative.

WARRANTY REGISTRATION
You may register your Echo equipment using the warranty registration card or register on-line at www.echo-usa.com. Registering provides a direct link between you and ECHO if we find it necessary to contact you.

ADDITIONAL OR REPLACEMENT MANUALS
Safety Manuals in English/Spanish or English/French are available, free of charge, from your ECHO dealer or at www.echo-usa.com.
Operator’s and Parts Manuals are available by:
• Downloading free from www.echo-usa.com
• Purchasing from your Echo Dealer.
• Manuals are available by sending a written request stating the model number and serial number of your Echo unit, part number of the manual, your name and address, and mail to the address below.
